FAQ

What is included in the price quoted?

We supply the timber parts, roof covering and the other required kit pieces. Build is also included.

Additional costs such as travel and accommodation may need to be added depending on your location.

Is electricity included as standard?

No, this would be an optional extra. We can install whichever electrics and heating system you require. This can be as simple as putting a plug in electric radiator or a wood burner. Sockets and switches can be installed at the time of build as well.

Is an off-grid option possible?

Yes. We can quote for and install Solar Panels as well as all the associated electrical and electronic systems.

What maintenance is required?

As it is supplied as untreated timber, it will require a high quality treatment at least every other year on the outside. It is very important that this is budgeted for at the start.

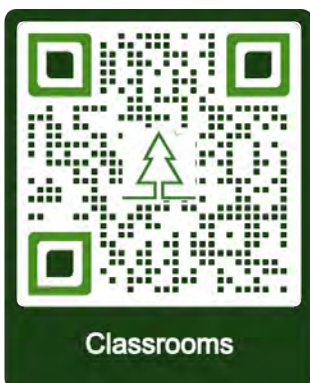

Can you bespoke build to our specification?

Yes, there is no issue with this at all.

Do I need planning permission?

We always recommend checking with your local council to see what they say. We can supply scale drawings if required.

If you need anymore information, please do get in touch!
